Traditionally better doors.

Entry Door Tax Credit Certification

This certification statement provides the documentation needed to receive an energy tax credit for entry doors as defined by IRS Notice 2006-26. Keep a copy of this document with your tax files. In the prospect of an audit, this document in conjunction with your receipt will serve as proof to the IRS that the entry door you purchased qualified for the energy tax credit.

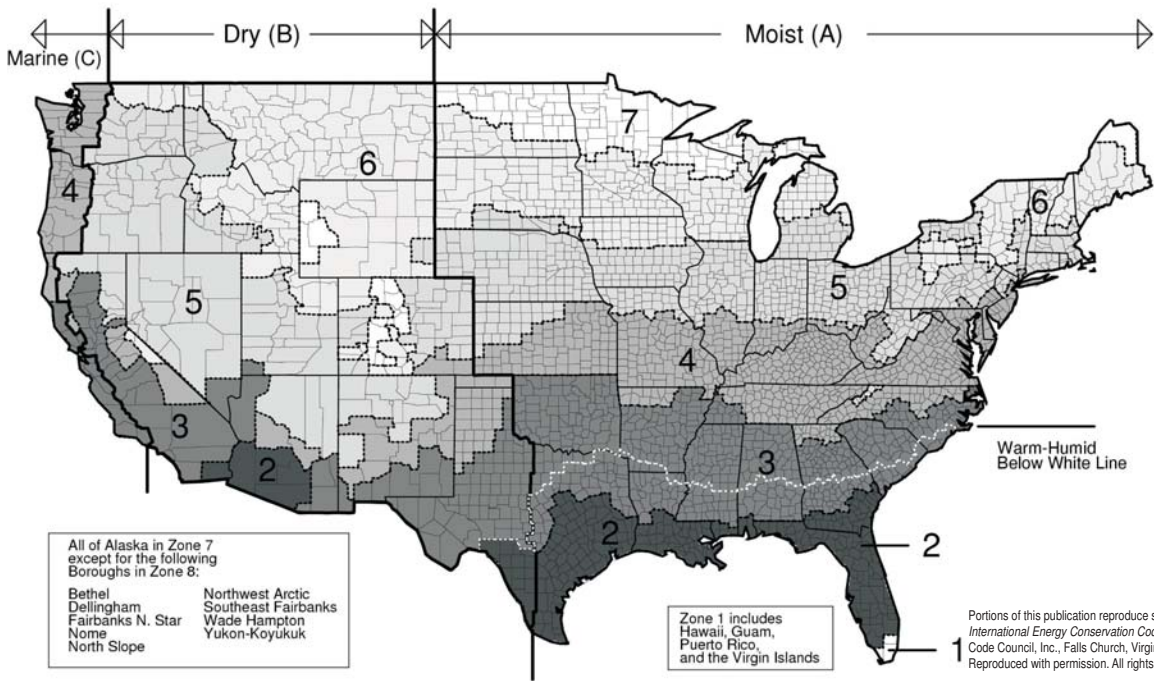

The climate you reside in determines which entry door models qualify for the energy tax credit as defined by the Energy Policy Act of 2005. Models listed in the sections labeled Climate Regions 1 thru 8 qualify for the tax credit nationwide.

A list of models that qualify for the tax credit in only a portion of the United States are located on page 3 of this document. Use the map below to determine the climate region you live in to see if your entry door qualifies for the energy tax credit.

To see a list of climate regions by state and county go to: www.precisionentry.com/taxcredit

Climate Regions

As identified in the 2004 supplement to the 2003 International Energy Conservation Code (IECC).

Manufacturer's Certification Statement

Precision Entry certifies that all exterior door models listed are eligible building envelop components and qualify for the Internal Revenue Code Section 25C tax credit. These models qualify in the climate regions listed above each section as identified in the 2004 supplement to the 2003 International Energy Conservation Code (IECC).

Under penalties of perjury, I declare that I have examined this certification statement, and to the best of my knowledge and belief, the facts are true, correct, and complete.
